

12 Oct 1961

State produced position paper on US initiatives to be taken with regard to GA Res 1472, XIVth Session, including suggestion that "States launching objects into orbit or sustained space transit should furnish data such as orbital or transit characteristics as soon as these have been determined, to the Secretary General for the purpose of registration of these launchings." A draft resolution was attached to the position paper.

This position paper was circulated to ~~SSAEXXNA~~ Defense, NASA and others, but not to CIA.

tn 31 Oct '61 -

The proposal was not coordinated with CIA before its ~~prop~~ submission in the 1177 - even though it would certainly limit CIA's freedom of action.

NRO review(s) completed.
